About the College Board

The College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, the College Board was created to expand access to higher education. Today, the membership association is made up of over 6,000 of the world’s leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, the College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success—including the SAT® and the Advanced Placement Program®. The organization also serves the education community through research and advocacy on behalf of students, educators, and schools.

Contacting Us

Regional and International Offices

Our College Board regional offices stand ready to help you find the guidance and enrollment tools you need, including workshops and other instructional programs for staff development, and recruitment, enrollment planning, admission, and placement services. Visit about.collegeboard.org for your regional office information.

Customer Service for Students and Parents

Students and parents can reach us 8 a.m.–9 p.m., ET (6:30 a.m.–8 p.m. in the summer).

PHONE: 866-756-7346
FROM OUTSIDE THE U.S.: +1-212-713-7789
EMAIL: sat@info.collegeboard.org
MAIL: College Board SAT Program
P.O. Box 025505
Miami, FL 33102

Services for Students with Disabilities

The SSD Office is open 8 a.m.–6 p.m. ET.

SSD COORDINATOR PHONE: 844-255-7728
STUDENTS/PARENTS PHONE: 212-713-8333
EMAIL: ssd@info.collegeboard.org

The SAT Educator Help Line

The following contact information is for educators only:

PHONE: 888-SAT-HELP (728-4357)
FROM OUTSIDE THE U.S.: +1-212-520-8600
EMAIL: sat.help@info.collegeboard.org

Higher Education

The following contact information is for admission staff only:

PHONE: 888-SAT-HELP
MAIL: The College Board SAT Program
PO Box 025505
Miami, Florida 33102

For regional office contact information, visit collegeboard.org/about/region-offices.

Score Reporting Information

For information about score reporting for high schools, districts, and states:

PHONE: SAT Educator Help Line (see above)
EMAIL: k12reports@info.collegeboard.org

For information about College Board higher education score reporting:

PHONE: 855-475-3636
EMAIL: hedreports@collegeboard.org

For information about College Board institutional codes, contact Code Control:

PHONE: 609-771-7091
EMAIL: codecontrol@ETS.org

The SAT and SAT Subject Tests Calendar
What’s New for 2017-18

Changes to the Test Calendar
To provide students with earlier opportunities to take SAT® and SAT Subject Tests™, and more time to focus on coursework, school activities, and college applications in the fall of their senior year, we’ve made the following changes to the test calendar:

- The SAT and SAT Subject Tests are now offered in test centers across the United States and U.S. territories on Saturday, Aug. 26, 2017. For students who need to take the test on a different day for religious reasons, Sunday centers will offer the tests on August 27.
- January administrations will no longer be offered.
- March testing will now be available internationally.
- Outside of the U.S. and U.S. territories, the following test dates are available:
  - SAT: Available October, December, March, and May.
  - SAT Subject Tests: Available October, November, December, May, and June.
- For the 2017-18 testing year, the Question-and-Answer Service will be offered in October 2017 and March 2018 for Saturday administrations in the United States and Canada. It will continue to be offered worldwide in May for all SAT testing.

Fee Waivers Have No Expiration Date
If your school distributes fee waivers, the new cards you receive for this purpose will no longer expire and can be used whenever the student needs them.

New Resources for Students
Help your students take advantage of these new resources from the College Board:

Roadmap to Careers is an online tool that lets students combine their interests and connect them to related careers, and then takes it further with tips for finding compatible schools on BigFuture™, and ideas for small, actionable steps to try out the careers and majors they discover. It lets students make informed academic and career decisions based on what truly drives them.

Expanded Subject Test practice, including access to video playlists in science topics from Khan Academy®, as well as three new, low-cost study guides in Chemistry, Biology, and Physics.
Expanding Opportunity with College Board Resources

The College Board is committed to making it easier for students to navigate a path from high school through college and career. We’re also helping states and districts meet their educational goals with programs that support curriculum and instruction and expand participation and improve performance in Advanced Placement Program® (AP®) courses.

Let’s look at some of the resources we offer to help you expand opportunity for students.

The SAT Suite of Assessments

The SAT Suite of Assessments focuses on the knowledge and skills that research shows are most essential for college and career readiness and success and also reflects what students are learning in the classroom.

The tests in the SAT Suite measure the same knowledge and skills in ways that make sense for different grade levels and that allow students, parents, and educators to monitor student progress. Using a common score scale, each test in the SAT Suite gives detailed feedback connected to standards and instruction and indicators of college readiness. The integrated system is made up of these tests:

- SAT
- PSAT™ 10—for 10th graders, administered in the spring
- PSAT/NMSQT®—for 10th and 11th graders, administered in the fall
- PSAT™ 8/9—for 8th and 9th graders, administered in the fall and spring

Together, the assessments in the SAT Suite provide benchmarks and consistent feedback for measuring student progress over time, helping educators adjust instruction based on their students’ needs. Go to sat.org to review test specifications, practice questions, full-length practice tests, and more.

All three PSAT-related assessments can be ordered through the College Board test ordering website at collegeboard.org/school. In spring 2018, the SAT will be available through the same portal for schools that want to administer the test on a school day to their students (ordering opens in December 2017).

Counselor Resources

K–12 Score Reporting Portal

The score reporting portal has expanded reports and data resources. You can run reports and view scores online in the portal’s Reports Center, and download SAT score data files in the Download Center. Access this at k12reports.collegeboard.org with the same sign-in credentials you use at collegeboard.org.

Student Score Reports

Your school can access scores for all assessments in the SAT Suite and the SAT Subject Tests for any student who lists your school code when registering. Schools will also get access to aggregate score reports, a downloadable student data file, and score labels formatted for printing.

SAT Registration Information

Join the thousands of counselors who use our SAT Roster Report to track their students’ SAT and SAT Subject Test registration and testing activity, including fee waiver usage. This information, accessible through the score reporting portal, can be downloaded in various formats for further analysis. The SAT Photo Viewer is a tool included in the Roster Report that offers secure access to students’ registration photos. Educators can use it to deter impersonation and ensure that students’ photos are acceptable.

Additional tools and resources are available at sat.org/k12.

Benchmarks

SAT College and Career Readiness Benchmarks help students and educators assess student progress toward college readiness from year to year by identifying students’ strengths and areas that need improvement. See “College and Career Readiness Benchmarks” (page 14) for more information.
Services for Students with Disabilities (SSD)

The College Board ensures that students with disabilities receive appropriate accommodations, such as braille, large print, and extended time, on its tests. The SAT, SAT Subject Tests, PSAT/NMSQT, PSAT 10, and AP Exams use a common eligibility process—once approved, accommodations are valid for all tests. Accommodations for the PSAT 8/9 may be offered without College Board approval.

Using the College Board’s SSD Online system, SSD coordinators can manage their students’ requests and approvals for accommodations with a real-time list that identifies all of their students who requested accommodations and their approved accommodation(s). Schools should apply early—the request process takes approximately seven weeks when documentation review is needed.

In January 2017, the College Board began using a new, streamlined process for approving test accommodations in which students’ school-administered plans may receive automatic approval. SSD coordinators don’t have to do anything different when requesting accommodations, but should notice fewer requests for documentation and quicker approvals in many cases.

Visit collegeboard.org/ssd for complete information on deadlines, eligibility requirements, guidelines for documentation, and access to SSD Online.

Higher Education and Enrollment Resources

Higher Ed Score Reporting Portal

With one secure sign in, institutions can access score reports and related data services through the score reporting portal at hedreports.collegeboard.org. Services include:

The Download Center Authorized personnel can download score reports designated for their institution by students.

SAT Trend Dashboard The trend dashboard is a snapshot comparing two years of SAT data for your college. Two dashboards are available: One compares year-to-date data for this year with end-of-year data for last year; the other compares data for the current graduating class to data for the previous year’s graduating class.

Student and Parent Resources

Student Score Reporting Portal

Students can view the scores for their SAT, PSAT/NMSQT, PSAT 10, and PSAT 8/9 assessments in one place by signing in to studentscores.collegeboard.org. This integrated score reporting portal has performance details, including feedback about high-level skills and potential to succeed in AP courses. And, the integrated score report is a hub for the College Board resources students get with their scores.

Fee Waivers

Eligible students can get fee waivers to take the SAT or SAT Subject Tests for free and to apply free to four colleges. Fee waivers never expire. See “SAT Benefits for Low-Income Students” for more information.

Free, Focused Practice

See “Getting Ready for the Tests” for details about College Board practice materials. All assessments in the SAT Suite give detailed feedback and links to related practice from Khan Academy, both through the integrated score reporting portal and at satpractice.org. Because they’re vertically aligned, students can see their progress from one test to the next.
BigFuture

Students get extensive resources—personalized practice aligned with their results, starter college lists, and more—with their online score reports. And, they can click through to the College Board’s comprehensive college planning site, bigfuture.org, to see how real students made their college choices. BigFuture helps students figure out the application process, access financial aid tools, explore majors, and more.

Roadmap to Careers

The College Board and Roadtrip Nation have created Roadmap to Careers to help students explore majors and careers that align with their interests and connect them to compatible schools on BigFuture. Visit collegeboard.roadtripnation.com for more information.

Participating in Student Search Service

Student Search Service is a voluntary program that connects students with information about educational and financial aid opportunities from more than 1,700 colleges, universities, scholarship programs, and educational organizations. Here’s how it works:

1. Students can choose to participate in Student Search Service when registering for a College Board assessment.
2. As part of taking a College Board assessment, students are asked to fill out a Student Data Questionnaire (SDQ).
3. Participating eligible organizations can use the data to search for students who may be a good fit for their communities and programs, but only among students who opt in to Student Search Service.
4. The search criteria can include any attribute from the SDQ except the following: disability, self-reported parental income, Social Security number, phone number, and actual test scores.
5. The most searched items are expected high school graduation date, cumulative grade point average (GPA), and intended college major. A full list of SDQ questions is available in The SAT and SAT Subject Tests Student Registration Booklet.

If you have questions or concerns about Student Search Service or want more information about the program, please call 866-825-8051. Note that:

- Once a student signs up for Student Search Service they’ll remain a participant even if they don’t opt in again.
- Colleges participating in Student Search Service don’t get student test scores or phone numbers. Colleges can ask for names of students in certain score ranges, but a student’s exact score isn’t reported.
- Being contacted by a college doesn’t mean a student has been admitted. Students must submit applications to be considered for admission. Student Search Service is simply a way for colleges to reach prospective students and inform them of their opportunities.
- Student Search Service will share a student’s contact information only with accredited colleges and approved educational or scholarship programs that recruit students. A student’s name will never be sold to a commercial marketing firm or retailer of merchandise or services (such as test prep).

NOTE: To protect information in the Student Search Service database, the College Board reserves the right to remove, with or without notice, individual students from the database.

More Important Information About Student Search Service

Student Search Service communications are sent by outside colleges, scholarship programs, and educational opportunity organizations. All entities who receive student information from Student Search Service are required to maintain strict confidentiality. We actively monitor these entities to ensure adherence to our guidelines. The frequency and mode of communication are determined by the entity that receives the student’s name. Every communication from individual entities is required to contain specific instructions on how to unsubscribe from that particular institution. To unsubscribe from the entire program, students can call 866-825-8051 or write to:

The College Board
11955 Democracy Drive
Reston, VA 20190
Attention: Student Search Service
About the Tests

The SAT

Each year, millions of students take the SAT at more than 7,000 test centers in more than 180 countries. Nearly all four-year colleges and universities in the U.S., including institutions that give applicants the option to submit college entrance test scores, use the SAT because it’s a fair and reliable measure of college and career readiness for all students.

Questions on the SAT reflect the work students are doing every day in high school courses to prepare for college. Visit sat.org/k12 for an in-depth look at the test specifications for the entire SAT Suite.

Why It’s Important to Take the SAT

The SAT is a critical step toward higher education for students of all backgrounds. When used in combination with high school GPA, SAT scores are shown to be the best predictors of a student’s potential to succeed in college.

The SAT covers core content areas deemed essential for success in college—reading, writing and language, and math. With the other assessments in the SAT Suite, the SAT provides an ongoing, grade-level picture of a student’s progress. Because it provides access to services like Student Search Service, the College Board’s college application fee waivers for eligible students, and scholarship opportunities, taking the SAT also connects students to opportunities and resources they might not be aware of.

Deeply and constructively tied to instruction and fully transparent, the SAT is designed to be a challenging yet appropriate and fair assessment of what students know and can do and to provide a more comprehensive picture of student readiness than ever before.

Content and Format

Built on a strong foundation of validity evidence, the SAT draws on a growing body of national and international research on the skills and knowledge needed for college and career readiness and success. Great care goes into developing and evaluating every question that appears on it. College Board test development committees, made up of experienced educators and other subject-matter experts, advise on the test specifications and the types of questions included in the test. Before appearing in a version that will count toward a student’s score, every potential SAT question:

- Is reviewed by external subject-matter experts, such as math or English educators, to make sure it reflects the knowledge and skills that are part of a challenging high school curriculum.
- Undergoes an independent fairness review process.
- Is pretested on a diverse sample of students under live testing conditions.

The SAT has four components—five with the optional 50-minute essay—with each component timed separately. The timed portion of the SAT with Essay (excluding breaks) is three hours and 50 minutes. Here’s a synopsis of the test content, as given in a standard testing room (to students with no testing accommodations):

<table>
<thead>
<tr>
<th>Component</th>
<th>Time Allotted (mins.)</th>
<th>Number of Questions/ Tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading Test</td>
<td>65</td>
<td>52</td>
</tr>
<tr>
<td>Writing and Language Test</td>
<td>35</td>
<td>44</td>
</tr>
<tr>
<td>Math Test – No Calculator</td>
<td>25</td>
<td>20</td>
</tr>
<tr>
<td>Math Test – Calculator</td>
<td>55</td>
<td>38</td>
</tr>
<tr>
<td>Essay (optional)</td>
<td>50</td>
<td>1</td>
</tr>
<tr>
<td>Total</td>
<td>180</td>
<td>154</td>
</tr>
</tbody>
</table>

**NOTE:** We occasionally pretest new items to determine if they should be included in a future SAT test form. These items may appear in any of the test sections, and testing time will be extended by 20 minutes so test takers have time to answer them. These items will not be included in computing test takers’ scores.

The optional SAT Essay uses virtually the same prompt across all test administrations—only the passage that students respond to is unique—so students can prepare by developing the underlying reading, analysis, and writing skills measured by the test.
Test Scores
Students get score reports that deliver detailed information about their skill and achievement levels. They can use this information to identify strengths and areas in need of improvement. Their SAT total score, reported on a 400–1600 scale, combines two scores: the Evidence-Based Reading and Writing score and the Math score. In addition to the total score, students get the following scores:
- Two section scores (200–800 scale):
  - Evidence-Based Reading and Writing (not including Essay)
  - Math
- Three test scores (10–40 scale):
  - Reading
  - Writing and Language (not including Essay)
  - Math
- Two cross-test scores (10–40 scale):
  - Analysis in History/Social Studies
  - Analysis in Science
- Seven subscores (1–15 scale):
  - Command of Evidence
  - Words in Context
  - Expression of Ideas
  - Standard English Conventions
  - Heart of Algebra
  - Problem Solving and Data Analysis
  - Passport to Advanced Math
- (Optional) Essay scores (2–8 scale):
  - Reading
  - Analysis
  - Writing

Essay Scores
The optional SAT Essay is scored based on students’ demonstrated comprehension, analysis, and composition skills. The three scores for the SAT Essay—Reading, Analysis, and Writing—are not combined or incorporated into any other scores reported by the test. Each essay has a 2–8 range, and a student's score on each dimension is based on the combined scores of two independent raters, who each assign a score with a 1–4 range on each of the three dimensions.

Comparing Scores Over Time
The redesigned SAT was introduced in March 2016. See “Understanding SAT Scores and Score Reports” (page 14) for information about comparing SAT scores earned today with scores earned before March 2016.

The SAT Subject Tests
The SAT Subject Tests are hour-long, content-based tests that give students a chance to showcase their achievement in specific subject areas. By including these tests in their college applications, students can stand out and give a more complete picture of their academic strengths and interests.

Some colleges and universities require or recommend SAT Subject Tests as part of the admission process to assess a student’s academic preparation for college. Some use them for placement or for advisement in course selection. A student may be able to place out of an introductory class or satisfy a basic requirement by submitting SAT Subject Test scores. Students should consult the admission policies of institutions they’re considering applying to for more information on testing requirements. See page 16 for more information about how colleges use test scores.

Content and Format of the Subject Tests
SAT Subject Tests are developed with the help of educators, from high school teachers to college instructors, representing a wide range of educational backgrounds and schools. To ensure reliability and fairness to all students, each Subject Test question goes through a rigorous two-year development process.

All SAT Subject Tests cover specific subject matter learned in the classroom, including interpretation and problem solving in the context of particular subjects. The foreign language tests measure reading comprehension, language usage, and vocabulary. Some language tests have a listening component.

Subject Areas and Formats
SAT Subject Tests fall into five general subject areas:
- English: Literature
- History: United States History, World History
- Mathematics: Mathematics Level 1, Mathematics Level 2
- Science: Biology E/M, Chemistry, Physics
- Languages: Chinese with Listening, French, French with Listening, German, German with Listening, Italian, Japanese with Listening, Korean with Listening, Latin, Modern Hebrew, Spanish, Spanish with Listening
All SAT Subject Tests are multiple-choice tests. However, some include special formats, which are detailed in The SAT Subject Tests Student Guide so that students can familiarize themselves with them before taking the specific tests.

- The SAT Subject Test in Biology E/M contains a core of 60 general-knowledge, multiple-choice questions, followed by 20 multiple-choice questions that emphasize either ecological (Biology-E) or molecular (Biology-M) subject matter.
- The SAT Subject Test in Chemistry contains some relationship-analysis questions that differ from multiple-choice questions in their directions, presentation, and answer requirements on the Subject Test answer sheet.
- Language with Listening Tests consist of both a listening section and a reading section. The Chinese, Japanese, and Korean tests also include a usage section. Students taking these tests are required to bring an acceptable portable CD player with earphones to the test center.

Deciding When to Take SAT Subject Tests

Get more details about the coursework recommended for each SAT Subject Test in The SAT Subject Tests Student Guide and online at satsubjecttests.org. In general, SAT Subject Tests are taken at the end of a related course, when the subject matter is fresh in the student’s mind. Here are a few additional points to note when counseling students:

**Language Subject Tests** Language Subject Tests are intended for students who have studied the language for at least two years in high school. The reading and listening tests have very similar levels of difficulty; however, the listening tests can provide a more comprehensive picture of a student’s skills. For this reason, colleges may prefer the listening tests to the reading-only tests for placement purposes. Language with Listening Tests are only offered in November.

**Biology-E or Biology-M** Students should consult with their biology teachers to see if they’re better prepared for a test with an emphasis on ecology (Biology-E) or molecular biology (Biology-M).

**Mathematics Level 1 or Mathematics Level 2** Mathematics Level 1 is designed for students who have taken three years of college preparatory mathematics. Mathematics Level 2 is designed for students who have taken more than three years of college preparatory mathematics, including some elementary functions (precalculus) and/or trigonometry.

Subject Test Scores

Scores for all SAT Subject Tests are reported on a 200–800 scale in 10-point increments, where 200 is the lowest score and 800 is the highest. A student’s scaled score is computed by first establishing a raw score as follows:

- For each correct answer, the student earns one point.
- For an incorrect answer to a question with five answer choices, the student loses one-quarter (¼) point.
- For an incorrect answer to a question with four answer choices, the student loses one-third (⅓) point.
- For an incorrect answer to a question with three answer choices, the student loses one-half (½) point.
- No points are deducted for omitted questions.
- The raw score is converted to a score on a 200–800 scale. This is the score that appears on the score report.

Language Test Subscores

Subscores are provided for listening, usage, and reading sections of some language tests. These subscores, reported on a 20–80 scale, reflect a student’s knowledge of a specific language skill; for example, reading subscores measure understanding of main or supporting ideas in a passage.

Language Tests and Native Language Speakers

Scores earned by native speakers are grouped with the scores of students who have had less exposure to the language. College admission staff know that native speakers are included in the percentile rankings and take that into account when they review scores. You can compare the two groups by using the tables that compare scores of students with varying years of study to scores of native speakers, available online at collegeboard.org/satdata.
Getting Ready for the Tests

Official SAT Practice

Practice with the PSAT/NMSQT, PSAT 10, and PSAT 8/9
The PSAT/NMSQT, PSAT 10, and PSAT 8/9 are great introductions to the SAT. They address the same content domains as the SAT, assessing skills developed through years of study in a wide range of courses as well as through reading, writing, and problem solving outside the classroom.

Students get free online access to personalized resources that help them take the next steps toward college and career.

Free, Focused Practice
In partnership with Khan Academy, the College Board offers free, personalized practice resources for all students. Our collaboration gives students and educators:

- Personalized online practice that complements classroom instruction.
- Free access—anytime, anywhere.

Official SAT Practice on Khan Academy is the only program developed in collaboration with the writers and developers of the SAT. It’s the best practice available—and it doesn’t cost a penny.

Personalized Study Plans
The College Board and Khan Academy give students a unique SAT study plan based on their performance on the SAT, PSAT/NMSQT, PSAT 10, or PSAT 8/9. This adaptive practice experience is tailored to each student’s strengths and weaknesses, using official test materials and supported by Khan Academy resources.

Official SAT Practice, available at satpractice.org, includes:

- Khan Academy instructional modules to address student knowledge gaps.
- Thousands of practice problems across the tests, reviewed and approved by the College Board.
- Official full-length practice tests written by the College Board.
- Online practice test scoring.

Tied to Classroom Learning
Working hard and engaging in challenging coursework helps students build the knowledge they need to be successful on the tests and ready for college and for career training programs.

Official SAT Practice links to classroom learning and guides students to:

- Focus on the knowledge and skills necessary for college and career readiness and success.
- Identify any knowledge and skill gaps in their SAT, PSAT/NMSQT, PSAT 10, or PSAT 8/9 performance.
- Practice in the content areas they need to work on the most.
- Build familiarity with the SAT format, question styles, and testing experience.
- Review key subject area concepts.
- Become familiar with test formats, directions, and question types.

Choosing and Preparing for SAT Subject Tests
Students benefit from their teachers and counselors’ advice about which test(s) to take, and when, based on their coursework and academic interests. Before taking any SAT Subject Tests, students should:

- Review key subject area concepts.
- Become familiar with test formats, directions, and question types by taking advantage of free College Board resources available online at satsubjecttests.org.
- View free videos on science topics available through Khan Academy.

Paper Practice and Registration Materials
For students who need paper resources, we offer the following materials:

- The SAT and SAT Subject Tests Student Registration Booklet, which comes in a packet with the paper registration form, a flyer explaining test day requirements, and a return envelope.
- A reference copy of The SAT Code List (domestic or international version) that students can use to look up test center and score recipient codes (also available online at collegeboard.org/sat-codes).
Online Resources

Getting Ready for the Tests

The SAT Student Guide, distributed free to high schools, has test-taking guidelines, sample directions, practice questions, and an official practice test. Students can upload their results to Khan Academy to get an automatic score report and a customized study plan.

The SAT Subject Tests Student Guide, distributed free to high schools, has test-taking guidelines and sample directions and questions from all 20 SAT Subject Tests. Free answer explanations are available online for every practice question in the booklet.

Online Access to Paper Forms

You can help your students use paper forms to request various score services. Forms are available for downloading and printing at sat.org/resources.

Creating a Free Online Account

Even students who don’t have their own computer get benefits from creating a free College Board account, including access to Khan Academy practice. All they need to sign up is an email address.

Online Resources

Test Information and Practice

Students can find more information about the SAT, how it links to the PSAT/NMSQT and other PSAT-related assessments, and what the optional SAT Essay assesses by visiting sat.org. Practice resources include:

- **Daily Practice** A free daily practice SAT question, available through our free mobile app or via Twitter @SATQuestion.
- **SAT Subject Test Practice Questions** Practice questions for all SAT Subject Tests; answer explanations are included. For science subjects, there are also free video lesson playlists from Khan Academy.
- **Official Practice Tests** Students can take free, full-length official SAT practice tests and get their scores right away, and then link to their Khan Academy account to build a study plan based on those scores.

Students can also go to satpractice.org to access resources from our partnership with Khan Academy, including personalized study plans based on their practice test or prior testing results and adaptive instruction designed to help them address skill gaps.

Registration Information

Students can look up test dates, registration deadlines and fees, and access the registration application at sat.org/register. Students testing internationally should check sat.org/international for additional information and requirements.

Scores and Access to Score Reporting

The site has score delivery dates and includes links to tools for reviewing and sending scores. To view their scores online, students can go to studentscores.collegeboard.org.

The online score report gives students details about their scores for each SAT Suite assessment they’ve taken, as well as information to help them make important decisions about high school course selection, taking additional assessments, and college and career aspirations.

Important Test Day Policies

Students should visit sat.org/test-day well before the test to make sure they understand and can comply with the SAT Program's Test Security and Fairness policies. They’ll find complete explanations of what to bring on test day, what IDs are acceptable, and more.

Affordable Printed Practice Materials

To help all students get ready for the SAT and the SAT Subject Tests, the College Board offers these affordable guides, available on our website and through bookstores.

The Official SAT Study Guide™

This best seller has:

- Eight official SAT practice tests, written in the exact same process and by the same team of authors as the actual test.
- Detailed descriptions of the Math and Evidenced-Based Reading and Writing sections.
- Targeted practice questions for each SAT question type.
- Guidance on the optional Essay, including practice Essay questions with sample responses.
- Seamless integration with Official SAT Practice on Khan Academy.
- A complete chapter on the PSAT/NMSQT.
The Official Study Guide for all SAT Subject Tests™
Second Edition

This edition includes previously administered tests for all 20 SAT Subject Tests, detailed answer explanations, the most up-to-date test tips and approaches, and the latest versions of the instructions, background questions, and answer sheet. Two audio CDs for the six Language with Listening Tests are also included.

The following guides contain the most current test instructions and test-taking tips and approaches, along with previously administered, full-length tests and detailed answer explanations. New guides for Mathematics Level 1, Level 2, U.S. History, and World History will be available beginning September 2017. Visit store.collegeboard.org for ordering details.

The Official SAT Subject Tests in Mathematics Levels 1 & 2 Study Guide™

The Official SAT Subject Test Study Guide in Biology
The Official SAT Subject Test Study Guide in Chemistry
The Official SAT Subject Test Study Guide in Physics
The Official SAT Subject Tests in U.S. and World History Study Guide™

Educator Resources

Most publications delivered to schools in the summer are available for reorder at sat.org/order-materials. If you need fee waiver materials or don’t see the publication that you need, call the Educator Help Line (see inside front cover for contact information).

Policy Guide for Counselors

See our online “Counselor Guide to SAT Policies and Procedures” at sat.org/resources, which lists policies grouped by topic:

- SAT Policies and Procedures
  - Registration
  - Test Day Regulations
  - Score Reporting
- SAT Terms and Conditions
  - Important Policies and Procedures
  - Test Security and Fairness Policies
  - Who Can Take the SAT
  - Protecting Student Privacy

Teacher Resources

SAT Teacher Implementation Guide

The Redesigned SAT Teacher Implementation Guide is designed to help teachers and curriculum specialists generate ideas about integrating SAT practice and skill development into challenging coursework through curriculum and instruction. The guide includes general instructional strategies for the Reading, Writing and Language, and Math Tests as well as the SAT Essay.

The guide offers skill-building strategies linked to sample SAT questions from each test, highlighting connections to best practices in instruction. These recommendations support teachers across all content areas and enhance instruction to build the skills students need for success in college and career. Go to sat.org/k12 for links to the guide and other resources.

Professional Development Modules

Professional development modules—including PowerPoint presentations, facilitator’s guides, and handouts—are available to deepen educators’ understanding of the SAT Suite of Assessments. Modules explain the content, structure, scores, and reporting for the SAT Suite.

SAT Subject Tests Teachers’ Guides

Teacher’s Guide to SAT Subject Tests in Mathematics and Teacher’s Guide to SAT Subject Tests in Science are available online and in print. These free guides familiarize teachers with the tests and include sample questions, answer explanations, and best practices from other educators to help prepare students to do their best on the SAT Subject Tests. Teachers can download or request the guides at satsubjecttests.org/teachers.

SAT Benefits for Low-Income Students

Thanks in large part to counselors and student advocates, the SAT Fee Waiver Service reaches large numbers of low-income students. Fee waivers give these students a great opportunity to show colleges they’re interested in higher education by taking the SAT or SAT Subject Tests. Counselors play an important role by encouraging students to take the tests and then apply to college.

An eligible student can take advantage of the following services for free or at a reduced rate:

- Up to two registrations for the SAT and up to two registrations for the SAT Subject Tests—a total
of four fee waivers. One fee waiver card covers one SAT registration or up to three SAT Subject Tests on one test day.

- Four additional score reports, which can be ordered at any time during the student's testing timeline.
- The Question-and-Answer Service (QAS) or the Student Answer Service (SAS). Students must order the service when registering to get it at no charge.
- Coverage of the non-U.S. regional fee for students testing internationally.
- Up to four College Application Fee Waivers.
- Up to eight CSS/Financial Aid PROFILE® fee waivers to use to apply online for nonfederal financial aid. Visit profileonline.collegeboard.org for more information.

Primary College Board Fee Waiver Eligibility Criteria

A student must be either enrolled in or eligible to participate in the National School Lunch Program (NSLP) to get a fee waiver. If your school participates in federal programs such as Community Eligibility, you can’t rely on a student’s participation in the NSLP—you must use the following other criteria or indicators to determine student fee waiver eligibility.

- The student’s annual family income falls within the Income Eligibility Guidelines set by the United States Department of Agriculture (USDA) Food and Nutrition Service (find these guidelines at www.fns.usda.gov/nslp/national-school-lunch-program-nslp and select “Income Eligibility”).
- The student is enrolled in a federal, state, or local program that aids students from low-income families (e.g., TRIO programs like Upward Bound).
- The student’s family receives public assistance.
- The student lives in federally subsidized public housing or a foster home, or is homeless.
- The student is a ward of the state or an orphan.

International Students

- Eligible U.S. citizens who will test outside the United States and U.S. territories may get fee waivers, which cover the cost of regular registration and the non-U.S. regional fee. The student is responsible for all other fees.
- Eligible students who are foreign nationals and who live and test in the United States or U.S. territories may also get fee waivers.

Distributing Fee Waivers

Schools receive allocations of fee waiver cards each year, based on the number of their students who used a fee waiver in the past academic year. Beginning in 2017-18, these cards have no expiration date. Counselors can call the Educator Help Line (see inside front cover) to request additional supplies.

Electronic College Application Fee Waivers

A student who uses a fee waiver for the SAT or SAT Subject Tests and plans to enter college in the 2018-19 academic year can use up to (but no more than) four college application fee waivers. College application fee waiver forms will be distributed electronically to students, eliminating the need for additional counselor verification.

Students will access their college application fee waivers via their College Board online accounts by going to sat.org and clicking “Sign In.” Once students sign in, they’ll see the message “Apply to college for free” with a link to where they can print their college application fee waivers, search for colleges that accept the waivers, and review submission instructions specific to each school. As you advise students, you may find it helpful to search for colleges that accept college application fee waivers by visiting collegeboard.org/waiver-colleges.

More Fee Waiver Information

Visit collegeboard.org/feewaiver for more information and to download The SAT and SAT Subject Tests Fee Waiver Service Counselor Guide.
SAT Score Reports and Reporting Services

Student Score Reports
Score reports for the SAT and SAT Subject Tests give students detailed information about their performance. Students get their scores online free of charge. They can also request paper reports, which begin mailing several weeks after scores are released online. (If they register by paper and don’t have an online account, they’ll automatically get a paper score report.) Both online and paper score reports answer frequently asked questions about SAT and SAT Subject Test scores, such as how the scores are determined, how to send additional score reports, and where students can view their essays.

Encourage students to review their scores online so they can take advantage of the information and links provided with their online reports.

Online Score Reports
Students—using a username and a password—can sign in to studentscores.collegeboard.org to access their online score report. They’ll see their complete SAT, SAT Subject Test, PSAT/NMSQT, PSAT 10, and PSAT 8/9 score history in one place. The online score report shows detailed and personalized information for each assessment to help students:

- Get insights into how they performed on each component of the test, including number of questions correct and relation to color-coded performance zones.
- Understand specifics about how the test is structured and scored.
- See how their scores compare with those of nationally representative samples of students.
- Determine whether they might benefit from taking the test again and working to improve their scores on a future test with Official SAT Practice and other resources.
- Search for the right colleges, majors, and careers based on their scores.
- View a printable copy of their actual essay response (available for students who take the optional SAT Essay), and see sample essays with various scores.

Sending Scores
When sending official score reports to colleges and scholarship programs, a student can:

- Choose up to four institutions to receive scores at the time of registration. These score reports are sent at no additional charge and are available through the date listed on the student’s admission ticket (usually nine days after the test date).
- Choose additional institutions to receive scores, at registration or at any time after.

With Score Choice™, students can choose to send the scores they feel best show their knowledge and skills to particular colleges or other institutions. See our online Guide to SAT Policies and Procedures at sat.org/resources for more information about Score Choice.

Institutional Score Reports
High schools, colleges, universities, and other institutions can access score reports and rich data reporting through the College Board online score reporting portals.

Official score reports are posted to the score reporting portals a few weeks after the test is administered. Several weeks later, score reports are mailed to any students or designated score recipients who requested paper score reports.

Online Score Delivery
All institutions, whether designated score recipients, high schools, or districts, have secure access to student records. This service is free to any institution that has internet access through the online score reporting portal hosted on the College Board’s website.

Online delivery is the fastest way to get scores, and the electronic files can be imported into various institutional data management systems used to maintain student files.

Schools that get scores electronically can download the latest electronic layout at k12reports.collegeboard.org. Designated institutions can do the same at hedreports.collegeboard.org.
Other Delivery Formats
Colleges, universities, and scholarship programs can order paper score reports in addition to, or instead of, online score reports. High school and district/state constituents can print score reports, including score labels, directly from the score reporting portal.

High School Score Reports
Score reports include a breakdown of the student's scores and information about what those scores mean. School counselors and college advisers can use these reports to guide students as they make decisions about taking high school courses and applying to college.

Test Score Rosters
High schools can access a printable roster after every test administration that lists attending students who tested during that administration. These reports and others are available on the score reporting portal.

SAT Scores on Transcripts
Students should send official score reports to the institutions they want to receive their SAT scores. High schools shouldn’t record SAT scores on school transcripts as this may result in SAT scores being sent to institutions that a student didn’t identify as score recipients. This practice is consistent with the practices of other College Board programs, including AP.

In addition, colleges can access a student’s essay only if a student sends official scores to that college; colleges also get important student information from the SAT Questionnaire, which is useful in recruiting, advising, and placement decisions.

College, University, and Other Institutional Score Reports
The majority of four-year colleges and universities require a college admission test such as the SAT and use the test scores in some capacity in making admission decisions. Some colleges also use the SAT for placement.

The SAT score report contains detailed information about a student’s performance and compares it with the scores of the approximately 1.7 million others who typically take the test. Score reports include a breakdown of the student's scores and information about what those scores mean. Students should send official score reports—the College Board can’t verify scores submitted as photocopies of score reports, printouts from the internet, or as part of high school transcripts.

All reports include scores selected by the student—up to six dates for the SAT and an additional six for the SAT Subject Tests. Descriptive information about the student is provided if the student completed the SAT Questionnaire. The Enrollment Planning Service™ market code and information about the student’s high school (provided by the high school) are also included.

Images of student essays are available from the College Board to supplement a student’s score report. Institutions can view an individual student's essay online using the individual essay locator ID that appears on each college score report and in the electronic file. Colleges can access images of essays from every test administration sent by the student to date.

Get more information about accessing students' essays at hedreports.collegeboard.org.
Understanding SAT Scores and Score Reports

Test scores have long been used by admission professionals and other educators to weigh and interpret students’ readiness for college and career success. The SAT and SAT Subject Tests provide information about a student’s developed reading, writing and language, and math skills (through the SAT) and mastery of specific subject areas (through the SAT Subject Tests)—knowledge and skills generally associated with college and career success. Because students from more than 26,000 high schools experience different educational models and grading systems, these test scores are a consistent and objective measure of students’ achievement in specific areas.

Test scores are used differently by the nearly 4,000 two- and four-year colleges and universities throughout the United States. At virtually all institutions, admission tests play a role in outreach, recruiting, selection, placement, and retention. There are many ways to use SAT scores in the admission process.

In all cases, score use should take place in the context of the institution’s mission and based on empirical data or a solid rationale or both. What may be an ideal use of SAT data at one institution may be ineffective or inappropriate at another.

The benchmarks are set to reflect typical annual growth from year to year in 8th–12th grade. SAT benchmarks indicate likelihood of success in college, while grade-level benchmarks indicate whether a student is on track for college and career readiness for their grade. Note:

- **SAT benchmark scores** represent a 75% likelihood of a student achieving at least a “C” grade in first-semester, credit-bearing college courses in a related subject.
- **Grade-level benchmark scores** are based on expected student growth toward the SAT benchmarks at each grade.

The SAT Suite of Assessment benchmarks work together to help students and educators assess student progress toward college readiness from year to year. They help:

- Identify students who are thriving and need greater challenges.
- Identify students who require additional academic support.
- Inform instructional and curricular enhancements throughout an institution.

Across the SAT Suite, the benchmark scores are as follows:

<table>
<thead>
<tr>
<th>Assessment–Grade Level</th>
<th>Evidence-Based Reading and Writing Benchmark</th>
<th>Math Benchmark</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAT</td>
<td>480</td>
<td>530</td>
</tr>
<tr>
<td>Grade 11</td>
<td>460</td>
<td>510</td>
</tr>
<tr>
<td>Grade 10</td>

<td>430</td>
</tr>
</tbody>
</table>

Guidelines on the Uses of College Board Test Scores and Related Data

*Guidelines on the Uses of College Board Test Scores and Related Data* highlights proper and beneficial uses of test scores and cautions against uses that are inappropriate. It’s available at research.collegeboard.org/data.

College and Career Readiness Benchmarks

The SAT Suite has an associated set of metrics—SAT College and Career Readiness Benchmarks. The benchmarks are based on actual student success in entry-level college courses. SAT benchmarks are set at the section level, with an Evidence-Based Reading and Writing benchmark and a Math benchmark for each assessment.
Understanding SAT and SAT Subject Test Scores

A college-bound senior is defined as a student graduating in the current academic year who took at least one SAT or SAT Subject Test during high school. Colleges use college-bound seniors as a reference group to make decisions about students who have applied for admission to their institutions.

Score Ranges

Scores are approximations rather than precise measures of knowledge and skills. The score range presents a better picture of performance by estimating how a score might vary if the student tested multiple times under identical conditions over a short period.

The standard error of measurement (SEM) is $\pm 40$ for the total score, $\pm 30$ for the section scores, and $\pm 2$ for the test scores, cross-test scores, and subscores. This means, for example, that if a test taker takes the test again, there is a 68% chance of his or her second total score falling within a range of 40 points above or below the first total score.

Comparing Scores

SAT

When comparing test scores, remember that the student’s true score is not a single number—a test taker may score slightly higher in one area but still have an equal level of achievement in areas where a somewhat lower score was earned.

SAT Subject Tests

Different groups of students take different SAT Subject Tests. For this reason, scores and percentiles on different SAT Subject Tests shouldn’t be compared. For example, a Biology percentile can’t be compared with a Literature percentile.

There are subscores for listening, usage, and reading sections of some language tests. These subscores, reported on a 20–80 scale, reflect a student’s knowledge of a specific language skill. For example, reading subscores measure understanding of main or supporting ideas in a passage.

Percentiles

Students, high schools, and postsecondary institutions can compare a student’s performance on the SAT or the SAT Subject Tests with the performance of other college-bound seniors by looking at the percentile ranks online at collegeboard.org/satdata.

On the SAT score reports, the Nationally Representative Sample Percentile compares the student’s score to a nationally representative group of 11th- and 12th-grade U.S. students. These percentiles show how students compare to all 11th- and 12th-grade U.S. students—including those who don’t typically take the test. The User Percentile compares the student’s score to performance on the new SAT by the graduating class of 2017 and concordance study participants from the class of 2016. In both cases, the percentile represents the percentage of the population with scores equal to or below the student’s score.

NOTE: Percentiles for SAT Subject Tests continue to represent the percentage of college-bound seniors who earned a score lower than the student earned.

Concordance Tables—Comparing Scores

Because the SAT given today is a different test than the SAT administered before March 2016, a numerical score on one test won’t be strictly equivalent to the same numerical score on the other. We’ve provided a concordance between the scores on the new SAT and the old SAT that shows how to relate the scores of one test to the scores of the other. We’ve also created a concordance between the new SAT and the ACT based on the previous concordance table between the old SAT and the ACT. The concordance information was released in May 2016. To view the data, visit sat.org/concordance.

Fairness, Difficulty, and Reliability

Fairness

Meticulous care goes into developing and evaluating each test for fairness. Classroom teachers, higher education faculty who teach first-year courses, test developers, and other trained content experts write the test questions for the SAT. For SAT Subject Tests, test developers, trained content experts, and members of subject-based development committees write the test questions.

Test development committees, made up of racially and ethnically diverse high school and college educators from across the country, review each test
Understanding SAT Scores and Score Reports

How Colleges Use Scores

question and test form before it’s administered. To ensure that the SAT and SAT Subject Tests are valid and reliable measures of the skills and knowledge specified for the tests, as well as fair to all students, the College Board maintains rigorous standards for administering and scoring the tests.

Careful and thorough procedures are involved in creating the test. Educators monitor the test development practices and policies and scrupulously review each new question to ensure its utility and fairness. Each test question is pretested before use in an actual SAT or SAT Subject Test. Newly developed questions aren’t used in SAT administrations until this rigorous process is completed.

Difficulty

Statistical analyses show that the difficulty level of the material on the SAT and SAT Subject Tests and the time allocated to each section are appropriate for the intended test takers. The SAT is designed so that a student who answers about half of the questions correctly will receive an average score.

Reliability

The SAT and SAT Subject Tests are highly reliable measures of college and career readiness. Statistical analyses of test questions show that students who take an SAT or an SAT Subject Test more than once in a short time earn similar scores at each testing. Interpretive data for SAT Subject Tests and the SAT can be found at collegeboard.org/satdata.

How Colleges Use Scores

Ways of Using Scores

Here are some ways institutions can use SAT and SAT Subject Test scores:

- Conduct research on SAT and SAT Subject Test scores and other criteria to identify characteristics used in decision making that predict success in course placement, completion of freshman year, and/or graduation.
- Include information about SAT and SAT Subject Test scores (such as the middle 50%) of all applicants, accepted students, or enrolled freshmen in promotional materials so students and counselors can develop an understanding of how a student might fit in a particular institution.
- Use SAT Subject Test scores to gain deeper insight into specific segments of students with nontraditional schooling backgrounds (e.g., homeschooled students, adult students, international students).
- Use SAT Subject Test scores as placement tools to ensure that students enroll in courses at the appropriate level.
- Review SAT Subject Test scores to determine a student’s readiness to take college-level courses in a specific subject area, relative to other students or prospective students at the institution.
- Recruit students (through College Board Search or from among those who have sent scores) who have SAT scores similar to those of accepted or enrolled students at that institution.

Using the SAT Essay

Strong reading, analysis, and writing skills are critical to success in college and workforce training. The SAT Essay gives students an opportunity to demonstrate college and career readiness by producing a cogent and clearly written analysis using evidence drawn from an appropriately challenging source text written for a broad audience.

Reasons for reading students’ essays include:

- To gain additional information about students’ proficiency in reading, writing, and analysis.
- To compare students’ SAT Essays with their application essays.
- To use as additional information in placement decisions.
SAT Validity Evidence

The College Board has gathered the following validity evidence for the new SAT and will continue to conduct related research to support the use of SAT scores for their intended purposes. A review of the evidentiary backbone for the SAT Suite can be found in the Test Design section of sat.org/highered.

Test Design

The design of the SAT is established on a strong foundation for validity. It draws on current national and international research into the knowledge and skills students need to be ready for and successful in college and career. On an ongoing basis, the College Board will review student performance metrics and other data to ensure that assessment questions and test forms are measuring the knowledge and skills they’re intended to measure.

Pilot Predictive Validity Study

The College Board conducted a pilot study of the predictive validity of the new SAT in partnership with colleges and universities. The study shows early evidence of the validity of SAT scores for predicting college performance. Specifically, the study examined the relationships between high school grade point average (HSGPA) and SAT scores with first-year grades in college. It also compared the incremental prediction of the SAT to that of HSGPA in predicting college grades in both English and math as well as first-year college GPA.

NOTE: Results of the pilot predictive validity study are published in The Redesigned SAT Pilot Predictive Validity Study: A First Look (eric.ed.gov/?id=ED563472).

Planned National Predictive Validity Study

Beginning with the first cohort of students who have primarily taken the new SAT (entering college class of fall 2017), the College Board, in partnership with colleges and universities, will conduct a longitudinal national SAT validity study to examine the relationship between SAT scores and college outcomes such as course grades and completion. Analyses by subgroups will be examined. The following outlines the time frame for this work:

- Before summer 2018: Institutions sign up to participate
- Summer 2018: Data file is received by the College Board, including completed data-sharing agreements
- 2019: Validity study is complete and distributed

Contact nsatvastudy@collegeboard.org if your postsecondary institution is interested in participating.
Quick Guide to SAT Information

Ordering Materials
Need more SAT materials? You can order this guide and any of the resources on this page by going to sat.org/order-materials. Or go to sat.org/resources to download these and other SAT resources.

For Counselors
Quick Reference Guide This guide lists dates, fees, and contact information for all College Board programs and services.

The SAT Code List (domestic and international) This book contains a complete list of College Board codes for test centers, colleges and scholarship programs, and college majors.

SAT Overview for Counselors (domestic and international) This brochure gives counselors the basics on the SAT and its benefits for students.

SAT Subject Tests Overview for Counselors (international) This brochure for counselors includes an overview of the tests and their benefits for students, tips on how to help students prepare, and international dates and deadlines.

For Students
The SAT and SAT Subject Tests Student Registration Booklet and Packet (domestic and international) The booklet provides step-by-step instructions and information for your students who need to register by mail. The packet also includes the registration form, return envelope, and a handout with a test day checklist and a guide to registration.

The SAT Student Guide This booklet gives your students information about the SAT, an official practice test, and test-taking advice and tips.

The SAT Subject Tests Student Guide This booklet helps your students get familiar with the 20 SAT Subject Tests and has practice questions and answers for each.

SAT Overview for Students (domestic and international) This brochure for students includes an overview of the SAT and SAT Subject Tests and their benefits, how to prepare, and test dates and deadlines.

SAT and SAT Subject Tests Calendar (domestic and international) This poster shows the 2017-18 test dates and registration deadlines.

SAT Subject Tests Practice CD This CD includes practice for all six Language with Listening Tests.

---

* Sunday tests are given the next day, except for Oct. 15, 2017.

** If registering through a representative, you'll need to submit by the early registration deadline. Be sure to review the test calendar carefully because not all subjects are offered on every test date. The SAT is offered internationally in October, December, March, and May. The SAT Subject Tests are offered internationally in October, November, December, May, and June.

---

** SAT Subject Tests are not offered on this date.**
