Expand Opportunities for Your Students with SAT School Day

One Day Can Make a World of Difference

To support you in clearing a path to college for your students, we’re making it easier than ever to provide students with an opportunity to take the SAT during the school day. The SAT School Day program allows states, districts, and schools to offer the SAT to juniors and seniors during a weekday in their home school, expanding access to a globally recognized college admission test that’s accepted at all U.S. colleges.

Benefits for Schools and Districts

Beginning in December 2017, the SAT can be ordered online for any number of students and administered in your school on a school day, allowing you to decide what works best for your students—all without a contract.

- **Simple to order:** For the first time, the entire SAT Suite of Assessments—including the PSAT/NMSQT®, PSAT™ 10, and PSAT™ 8/9—will all be available to order online, all in one place. You’ll also be able to administer any of the tests in the SAT Suite at the same time.

- **Easy to monitor progress:** All tests in the SAT Suite share a common score scale and are appropriate for their designated grade levels. This makes it easy to track performance across tests to measure growth and identify areas where students need help. Our new interactive reporting portal makes it easy to view integrated data across the SAT Suite.

- **Supports equity:** When students have the opportunity to test at their own school, they’re more likely to take the test. By providing a college admission test in school, you’re also supporting a college-going culture for the whole school.

“The SAT School Day program has been essential in helping our students on the path to college. Since we started utilizing the assessment in 2010, we have seen a significant increase in college enrollment and financial aid. **Our class of 2017 received over $380 million dollars in scholarships and financial aid, a 300% increase from 2010.**”

JENNIFER ERTEL, COLLEGE READINESS MANAGER, HOUSTON ISD
Help Your Students Cross the Finish Line

SAT School Day breaks down barriers students face on their path to college.

- **Expands access:** When students take the SAT in school during the school day, they don’t have to juggle weekend responsibilities or find transportation. And eligible low-income students can send their SAT scores to 8 (instead of the standard 4) colleges or scholarship programs, and apply to 4 colleges—all for free.

- **Increases comfort:** Students have lower stress levels when they test in a familiar setting with people they know.

- **Builds confidence:** Nothing builds confidence like practice and the SAT is the only admission test that offers free, personalized practice plans for all students. Official SAT Practice on Khan Academy® provides every student with a practice plan built just for them, along with integrated coaching tools for teachers to view progress and support their students.

Research shows that students who spend 20 hours on Official SAT Practice gain an average of 115 points from the PSAT/NMSQT to the SAT.

Complete the Suite

The SAT Suite reflects what students are already learning in their classrooms and gives you benchmarks for assessing students’ progress as they enter and move through high school. The tests share a common score scale, making it easier to measure growth.
